## EDUCATION

- 2019 - current University of Washington, Seattle, WA**  
Ph.D. Student in Computer Science and Engineering (GPA: 3.97/4)  
‣ Advisors: Ira Kemelmacher-Shlizerman, Steve Seitz  
‣ Affiliations: UW Reality Lab, UW Graphics and Imaging Lab (GRAIL)  
‣ Research Interest: Audio-visual, Deep Learning, Music Information Retrieval
- 2015 - 2019 Harvey Mudd College, Claremont, CA**  
Bachelor of Science in Computer Science (GPA: 3.8/4, CS GPA: 3.87/4)  
‣ Graduated with High Distinction and Departmental Honors in Computer Science.

## EXPERIENCE

- August 2019 Amazon.com, Inc. Seattle, WA**  
**May 2019** Applied Scientist Intern, Customer Behavior Analytics Team  
‣ **Customer Segmentation:** Developed a semi-supervised deep learning algorithm for clustering high-dimensional customer data using Python and MXNet Gluon. The proposed method improved clustering performance by 26% and is deployed to production for improving customer's downstream impact estimation.  
‣ **Distributed Deep Learning:** Developed a pipeline for neural network distributed training and inference using Spark and Amazon EMR cluster.  
      
- May 2019 Microsoft Corporation Redmond, WA**  
**September 2018** Remote Co-op Technical Consultant, Advanced Reading Technologies Team  
‣ **Reading Tool:** Collaborated with a research team from Microsoft Research on a project of developing a reading tool for improving users' reading experience based on an eye-tracking device.  
‣ **Eye-tracking Data Analysis:** Developed an automated system to detect and classify points of interest based on user reading behavior into interested, confused, and skimming categories using Python.  
  
- May 2019 Harvey Mudd College Claremont, CA**  
**January 2016** Research and Teaching Assistant  
‣ **Research Assistant - Music Information Retrieval:** Developed a dynamic programming algorithm for multi-modal alignment between sheet music and corresponding computer-synthesized MIDI. Designed a deep fully convolutional network for detecting musical notes on sheet music and generating compact representations for the alignment using Python, Keras, and Tensorflow.  
‣ **Research Assistant - PCB Developer:** Designed and developed a PCB consisting of a microcontroller SAM4S and a Cyclone IV FPGA to be used in a microprocessor-based systems class and created lab instructions based on the developed PCB.  
‣ **Research Assistant - Stock Market Analysis:** Applied machine learning techniques to detect anomalies in stock market data. Developed a backtesting system and an actual automated trading system that connects to InteractiveBrokers for real-time trading. Developed the distributed system and front-end using Python, Django, and Celery for parallelization.  
‣ **Teaching Assistant:** Tutored students, held office hours, graded students' homework for Machine Learning, Big Data, and Microprocessor-based Digital System.
