EDUCATION

- 2019 - current University of Washington, Seattle, WA**
Ph.D. Student in Computer Science and Engineering (GPA: 3.97/4)
➤ Advisors: Ira Kemelmacher-Shlizerman, Steve Seitz
➤ Affiliations: UW Reality Lab, UW Graphics and Imaging Lab (GRAIL)
➤ Research Interest: Audio-visual, Deep Learning, Music Information Retrieval
- 2015 - 2019 Harvey Mudd College, Claremont, CA**
Bachelor of Science in Computer Science (GPA: 3.8/4, CS GPA: 3.87/4)
➤ Graduated with High Distinction and Departmental Honors in Computer Science.

EXPERIENCE

Current September 2019	University of Washington Research Assistant ➤ Audio Source Separation: Developed a novel method for speech separation using deep learning. Our method illustrates state-of-the-art separation performance, works with real-world voices, and handles arbitrary, unknown number of potentially moving speakers. We published our work as an oral paper in NeurIPS 2020. Project Page: Here  	Seattle, WA
August 2019 May 2019	Amazon.com, Inc. Applied Scientist Intern, Customer Behavior Analytics Team ➤ Customer Segmentation: Developed a semi-supervised deep learning algorithm for clustering high-dimensional customer data using Python and MXNet Gluon. The proposed method improved clustering performance by 26% and is deployed to production for improving customer's downstream impact estimation. ➤ Distributed Deep Learning: Developed a pipeline for neural network distributed training and inference using Spark and Amazon EMR cluster.       	Seattle, WA
May 2019 September 2018	Microsoft Corporation Remote Co-op Technical Consultant, Advanced Reading Technologies Team ➤ Reading Tool: Collaborated with a research team from Microsoft Research on a project of developing a reading tool for improving users' reading experience based on an eye-tracking device. ➤ Eye-tracking Data Analysis: Developed an automated system to detect and classify points of interest based on user reading behavior into interested, confused, and skimming categories using Python.   	Redmond, WA

May 2019 January 2016	Harvey Mudd College Research and Teaching Assistant <ul style="list-style-type: none"> ➤ Research Assistant - Music Information Retrieval: Developed a dynamic programming algorithm for multi-modal alignment between sheet music and corresponding computer-synthesized MIDI. Designed a deep fully convolutional network for detecting musical notes on sheet music and generating compact representations for the alignment using Python, Keras, and Tensorflow. Our method is published in ISMIR 2019. ➤ Research Assistant - PCB Developer: Designed and developed a PCB consisting of a microcontroller SAM4S and a Cyclone IV FPGA to be used in a microprocessor-based systems class and created lab instructions based on the developed PCB. Our work is published in GLSVLSI 2020. 	Claremont, CA
	<ul style="list-style-type: none"> ➤ Research Assistant - Stock Market Analysis: Applied machine learning techniques to detect anomalies in stock market data. Developed a backtesting system and an actual automated trading system that connects to InteractiveBrokers for real-time trading. Developed the distributed system and front-end using Python, Django, and Celery for parallelization. ➤ Teaching Assistant: Tutored students, held office hours, graded students' homework for Machine Learning, Big Data, and Microprocessor-based Digital System. <div> Python C/C++ Keras Tensorflow Django Quartus </div>	
August 2017 May 2017	Intel Corporation Remote Summer Research Assistant <ul style="list-style-type: none"> ➤ Proposed a computational model for sound field separation and reconstruction of a 3-dimensional acoustic environment. ➤ Designed a headphone-based system to simulate 3-dimensional sound localization effects using Head-Related Transfer Functions using Python. <div> Python </div>	Santa Clara, CA
May 2017 January 2017	Environmental Data Resources (EDR), Inc. Remote Part-Time Software Developer <ul style="list-style-type: none"> ➤ Implemented a Hidden Markov model and support vector machine model for automatically parsing US addresses into computer-readable formats. <div> Python C/C++ scikit-learn </div>	Shelton, CT

PUBLICATIONS

THE CONE OF SILENCE: SPEECH SEPARATION BY LOCALIZATION

2020

Proceedings of the 34th Conference on Neural Information Processing Systems (NeurIPS) [Oral Paper]

Vancouver, Canada

PROJETS

COCONUT ONLINE INTERPRETER

2018

<https://cs121-team-panda.github.io/coconut-interpreter/>  github.com/cs121-team-panda/coconut-interpreter

Designed and implemented a web-based online interpreter for the open-source Coconut programming language using Flask, React, and AWS Lambda. Built fully automated CI/CD pipelines on CircleCI.

Python JavaScript React Flask Amazon Lambda CI/CD

FPGA-BASED CRYPTOCURRENCY PLATFORM

2017

 github.com/fangherk/MicroPCoin

Designed and implemented a simulated cryptocurrency platform with hash computations by FPGA using Raspberry Pi, C, Flask, and SystemVerilog.

Python C/C++ SystemVerilog Flask FPGA Raspberry Pi

HONORS

November 2018	5th Place , ACM-ICPC Southern California Regional 2018
March 2018	Honorable Mention , North American Invitational Programming Contest 2018
November 2017	5th Place , ACM-ICPC Southern California Regional 2017
September 2017	1st Place , Microsoft Coding Competition (MSFT3C) - Harvey Mudd College
November 2016	9th Place , ACM-ICPC Southern California Regional 2016
November 2015	7th Place , ACM-ICPC Southern California Regional 2015
May 2014	Honorable Mention , Asia-Pacific Informatics Olympiad 2014
May 2013	1st Place/Gold Medal , Thailand Olympiad in Informatics 2013

SKILLS

Programming	Python, Spark, C/C++, JavaScript, \LaTeX , SystemVerilog, Tensorflow, Keras, MXNet, PyTorch
Services	Amazon EC2, Amazon EMR, Amazon S3, Amazon Lambda, CI/CD
Web Development	Node.JS, Django, Flask, Redux, React, HTML5
